

YONAS ALEM

Senior Full-Stack Developer

6+ Years of Experience

Addis Ababa, Ethiopia | +251 936 972697

yonalem21@gmail.com | linkedin.com/in/yonasalem21 | github.com/Yonas21

PROFESSIONAL SUMMARY

Full-stack engineer with 6+ years of experience and 10+ production projects spanning backend services, high-traffic APIs, and modern web applications. Proven track record of rebuilding legacy systems into scalable microservice architectures, reducing query response times by up to 90%, and automating finance and operations workflows. Known for clean engineering practices, system reliability, and elevating team capabilities through mentorship and code review.

SKILLS

Technical Skills: TypeScript, JavaScript, PHP, Go, Python, Node.js, React, Next.js, PostgreSQL, MongoDB, Redis, Docker, Kubernetes, AWS, gRPC

Soft Skills: Technical Mentorship, Cross-Functional Communication, Agile Leadership, Code Review, Remote Collaboration

PROJECTS

Real Gaming Poker Platform

Senior Full-Stack Developer | Mereb Technologies | Apr 2022 – Aug 2025

- Architected and built backend services using PHP, Protobuf, and gRPC, driving the company's migration from monolith to microservices and improving deployment independence across 5 service domains
- Developed automation scripts for gameplay bonuses, deposit handling, and accounting workflows, reducing manual processing by 70% and eliminating reconciliation errors
- Optimized database queries and introduced Redis caching layers, cutting average API response times from 1.2s to under 200ms and reducing system downtime by 40%
- Maintained stable release cycles through rigorous code review, feature testing, and CI/CD pipeline management, resulting in zero critical production incidents over 12 months
- Mentored 4 junior developers through onboarding, technical walkthroughs, and pair debugging sessions

Tools: PHP, Node.js, gRPC, Protobuf, Redis, PostgreSQL, Docker, GitHub Actions | KPIs: API latency, uptime, release frequency

Affiliate Marketing Platform

Full-Stack Developer | Affiliate.com | Feb 2023 – Aug 2023

- Rebuilt a legacy PHP API using Node.js and tRPC, improving reliability by 60% and enabling 3x higher request throughput under peak traffic
- Automated finance reporting workflows using Python, reducing weekly manual effort from 8 hours to 30 minutes and improving data accuracy
- Developed internal dashboards with React and Tailwind CSS, giving sales and ops teams real-time visibility into conversion funnels and engagement metrics
- Collaborated with backend and operations teams to diagnose and resolve API bottlenecks, streamlining data flows across 3 integrated systems

Tools: Node.js, tRPC, React, Tailwind CSS, Python, Express, MySQL | KPIs: Throughput, reporting turnaround, conversion visibility

Autobridge Government Constituent Platform

Backend Developer | Autobridge Systems | Jan 2025 – Jul 2025

- Built backend services for citizen complaint submissions, document approvals, and automated messaging workflows serving 50K+ constituents
- Integrated Azure Cognitive Services for voicemail-to-text transcription and intelligent message classification, reducing manual triage workload by 55%
- Optimized large-scale database queries through indexing and cursor-based pagination, reducing multi-minute queries to under 2 seconds

Tools: Node.js, Azure Cognitive Services, PostgreSQL, REST APIs | KPIs: Query performance, triage efficiency, citizen response time

AI-Powered Resume Tailoring Platform (Upplai)

Full-Stack Developer | Feb 2025 – Jun 2025

- Integrated OpenAI models to generate personalized resumes, cover letters, and ATS-optimized recommendations, improving user interview callback rates
- Implemented fully responsive design with device-specific breakpoints, achieving consistent UX across desktop, tablet, and mobile platforms

Tools: React, Next.js, OpenAI API, Tailwind CSS, Node.js | KPIs: ATS pass rate, cross-device compatibility

Enterprise Web Applications Suite

Frontend Developer | Eaglelilon Systems Technology | Mar 2021 – Apr 2022

- Delivered production-ready web applications from Adobe XD designs using React and Next.js, achieving pixel-perfect implementation across 6 client projects
- Integrated Telebirr, Visa, and Mastercard payment APIs with proper validation and error handling, improving transaction success rates by 25%
- Improved site performance through code-splitting, lazy loading, and component refactoring, reducing initial load times by 45%
- Collaborated closely with designers and backend engineers to refine UI behavior and ensure smooth user experiences

Tools: React, Next.js, JavaScript, REST APIs, Adobe XD, Bootstrap | KPIs: Load time, payment success rate, design fidelity

EDUCATION

Addis Ababa University

Bachelor of Science, Software Engineering

Related Coursework: Data Structures, Algorithms, Database Systems, Software Architecture, Distributed Systems, Operating Systems

SKILLS

Tools/Analytics/Languages: TypeScript, JavaScript, PHP, Go, Python, HTML, CSS, SQL, Git

Frameworks/Platforms: Node.js, Express, FastAPI, React, Next.js, Laravel, Tailwind CSS, Material-UI, Bootstrap, Docker, Kubernetes

Methodologies/Process: Full-Stack Development Lifecycle, CI/CD Pipelines, TDD, Microservices Architecture, Code Review, Agile/Scrum

Data/Experimentation/KPI: API latency, system uptime, release frequency, query performance, scalable architectures, responsive UI behavior

Collaboration/Product Management: Lead development teams, JIRA, Notion, Slack, DataDog, cross-functional communication, remote collaboration

Cloud/Infrastructure: AWS (EC2, S3, Lambda), Azure Cognitive Services, Docker, Kubernetes, GitHub Actions, Redis, gRPC
